

ULTIMATE CAMPERS

Here's an off-road adventuring machine ready to take on the world

Ultimate has been building off-road campers for 16 years, and has established an excellent reputation and acclaim for its designs, customer service, and product backup. Ultimate has a corporate philosophy of listening to its clients, and always striving to deliver what they seek.

The Xtrk is a result of continuing requests from Ultimate Camper clients for a camper with the stature of the flagship model, the Elite, but at a more affordable price. The initial challenge was how the Ultimate team would build a more affordable camper without compromising the off-road capability, reliability and practical ease of use that

Ultimates are renowned for. By drawing from the significant knowledge base of dedicated staff that Ultimate employs, listening to their clients' requests and feedback, and using the design concepts employed in their original Elite design, the Xtrk has been released.

The Xtrk is aimed at a wide range of campers, young and old. The key to the appeal of the Xtrk is its ability to be customised with exactly what you want, and nothing you don't. This means that you can travel in a robust unit that's comfortable enough for extended trips that won't break the bank, or build it up to suit your exact needs.

SPECIFICATIONS

- 110L water carrying capacity
- 700kg tare weight
